

Boogie Blue Water Filters: Basic, Classic, & Plus models

Using catalytic carbon/KDF membranes. All models reduce chlorine, chloramine, heavy metals, pesticide residue, mercury, dissolved solids, fluoride, and other chemical compounds.

All models thread onto any 3/4 inch hose.

Approximate life span:

- **Boogie Blue Basic** – 10,000 gallons
- **Boogie Blue Classic** – 35,000 gallons
- **Boogie Blue Plus** – 45,000 gallons

The **Boogie Blue Basic** provides great all-around filtration and flow-rate, with a single catalyzed-carbon membrane.

The workhorse **Boogie Blue Classic** has the original dual-membrane, quality inline filter.

The **Boogie Blue Plus** is our most technically-sophisticated filter model yet! The top caliber **Boogie Blue Plus** utilizes a dual activated and catalyzed carbon membrane with an extra 11 ounces of KDF filtration material. The **Boogie Blue Plus** reduces chlorine, chloramine heavy metals and other toxins such as pesticides chemical contaminants and volatile compounds.

Use the **Boogie Blue Plus** as a stand alone filter with an effective lifespan of approximately 45,000 gallons.

The **Boogie Blue Plus** also functions as an excellent companion filter to the original **Boogie Blue Classic** and the **Boogie Blue Basic**, for even greater effectiveness and improved lifespan.

The Original First Family of Hose-Mount Water Filters

The **Boogie Blue Basic**, **Boogie Classic** & **Boogie Blue Plus** represents the best values in hose-mount filters. Easily installed on any 3/4" hose-outlet, they will help you to achieve gardening excellence!

Save your soil's biology cost-effectively with one of our handy & practical **Boogie Blue** water filters! Literally dozens of uses around the home and garden: Buy two and keep one installed on your garden hose, while keeping another one handy for common chores, like washing the car or even as a supplementary inline filter for a household drinking system. Pets and livestock will love the improvements in their drinking water, too!

Boogie Blue Inline Hose-Mount Water Filters

The **Boogie Blue Basic**, **Boogie Classic** & **Boogie Blue Plus** represents the best values in hose-mount filters:

- Reduce chlorine plus chloramine compounds and save your soil biology.
- Lower heavy-metals, pesticides, chemical-contaminants & volatile compounds.
- Super handy filters for your yard and property; thread onto any 3/4" hose! Chlorine and Chloramine compounds are used in most municipal water systems to destroy all active biology present in the water. The use of an effective filter is required for watering an organic garden and especially for creating compost tea.

Depending on which model you elect to purchase, (they all represent excellent value), our **Boogie Blue** filters will effectively scrub anywhere from 10,00 to approximately 50,000 gallons of water of up to 99% of the chlorine and 87% of the chloramine compounds used in municipal water supplies. Using advanced materials like catalyzed carbon and, in our **Classic** & **Plus** models, generous quantities of highly effective KDF 85 & KDF 55 copper-based filtration membrane, the **Boogie Blue** family of water filters will perform the specific duty of removing compost tea's #1 enemy, (chlorine), admirably! For most

farmers, this means a year or more of service.

With an unmatched quality-to-price-point ratio, the **Boogie Blue Basic** holds its own merit as a high-value 'entry-level' hose-filter. It also functions as an excellent companion filter to the original **Boogie Blue**

Classic and the **Boogie Blue Plus**, allowing for even greater effectiveness and improved lifespan.

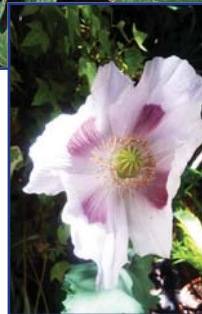

Boogie Blue Plus (High-Capacity Filter)

Resin-Ion Exchange Carbon + Maximized KDF Content = 45k gallons! With a dual catalytic-carbon & KDF membrane, the **Plus**

model is built with similar construction to our original **Boogie Blue**, (now renamed the "**Classic**" **Boogie Blue**). However, it contains **more** carbon, (almost 6 oz more) and **more** chlorine & chloramine-scrubbing KDF material, (11oz of KDF). Furthermore, the carbon membrane has been improved to include a superior grade of catalytic material, (Resin-Ion Exchange), which has shown great promise at arresting increased levels of heavy-metals.

Take your soil-saving filtration to the next level with the **Boogie Blue Plus**, Rated at an approximate lifespan of 45k gallons, the **Boogie Blue Plus** is a **Boogie Blue Classic** on steroids! Providing the heavy-usage farmer with superb filtration capacity and an extended lifespan, the **Boogie Blue Plus** offers incredible performance & the utmost-bang for your filtration-buck!

Along with containing approximately 11oz of chlorine-busting Copper/KDF membrane material, the **Boogie Blue Plus** also meets top standards in eliminating heavy metal and chemical compounds. It uses a resin-ion exchanged / catalyzed grade of carbon, as mandated by Erin Brockovich for effective control of lead and chloramines.
